

1st March 2018

Dear Ms. Horn,

Re: Maurice Kirk d.o.b. 12.3.1945

Thank you for your polite letter dated 14th February. I understand from my brother that he was indeed denied access to his medicine which had been prescribed by his French doctor and previously by his UK doctor from 14th December until very recently when he can take it when he is called to the medication hatch.

Apparently the tablets are well known for indigestion but are vital for Maurice as he has a suspected torn diaphragm which may be carcinogenic. Without these tablets, to be taken before eating, he suffers acute pain. Swallowing them out of the regime they remain ineffectual. As a highly educated medical person he understands his physiology (and that of your cat) better than anyone else in the prison. I know that is not your concern but his health should be! He needs his appointment at a local hospital confirmed by you. He needs the test required for his possible carcinoma. At almost 73 years of age it should be of some concern to you that he has chosen to stop eating so as to reduce his digestion pains.

Until recently he had food delivered to him. Now no food is brought to his cell. I believe that this is highly irregular and deem it as illegal. Perhaps the prison is unaware of of this.

I do hope that common sense will prevail and that Maurice Kirk will receive the medication and the hospital appointment he has so far been denied before he dies under your 'care.' Do remember that any mention of a MAPPA designation is totally erroneous and only there at the behest of the South Wales Police.

Yours sincerely

Mrs Celia Jeune
(Retired magistrate)
