Dear Ms. Ryder,

Re: Maurice John KIRK A7306AT

I am Maurice's sister who has been a lay magistrate in the past in Jersey. I am most concerned by the way my brother has been treated over the past years. At last he has received a few of the documents he has long been wrongfully denied which explains the conditions under which he has been held .

He has only now been told that his convictions included misuse of narcotics, ABH, firearm offences and child abuses. These are on his record when none of these can be proved and have not been heard in any court . This is clearly highly alarming as it indicates that errors, deliberate or otherwise, have been perpetuated for no reason.

Medical reports have been treated similarly. Reports from Caswell Clinic have been fabricated. The prison will remember that doctors said he had a brain tumour and was psychiatrically damaged in 2009. None of this has proved true; there are neurological investigations refuting these allegations. Medical reports from HMP Parc have been altered.

Maurice should not be with you. He should receive his exit permit, and his latest blood test results as soon as possible so he can seek further treatment in a hospital which can help him restore his health away from the corrupt personalities involved with his case over the years.

I trust this matter will be addressed.
